

INSTRUCTIONS FOR THE PREPARATION
of
NEW JERSEY SCHEDULE "Q" – (CALL #1Q)
"TOTAL EXPERIENCE"

This report is an exhibit of New Jersey experience under all direct policies of Workers Compensation and Employers Liability Insurance written effective on and after January 1, 1942. It is for the purpose of making available to the Compensation Rating and Inspection Bureau (NJCRIB) accurate data for use in supplementing the experience filed in the Schedule "W" – "TOTAL EXPERIENCE" report. This form requires the reporting of accumulated New Jersey Workers Compensation loss experience by **ACCIDENT YEAR**.

Accident year refers to a method of organizing financial loss data based upon the date the losses occurred. For example, accident year 2006 includes claims with accident dates occurring in 2006.

Data collected in this report includes losses from policies effective on and after January 1, 1942 valued as of December 31, 2009. Accident year losses for 1942 through 1987 are to be shown in summarized format on line (A) of each report page. Accident year losses for 1988 through 2009 are to be shown individually on lines (B) through (V) of each report page. Please note that accident year 1942 should reflect losses from policies effective in 1942 only. The reporting of accident year losses on page (1) and the indemnity and medical split data on page (2) is mandatory for all applicable years. Losses required include the indemnity and medical totals for losses paid, outstanding case reserves (excluding IBNR and bulk reserves), IBNR and bulk reserves and total incurred losses. An incurred indemnity claim count is also required for certain years.

The Schedule "Q" – Total Experience includes an additional individual accident year. Therefore, Line (A) of this report, the summarization of accident years 1942 through 1987, is the same as last year. Lines (B) through (V) also represent the same accident years as last year. It is expected that an additional accident year will be included in future reports until further notice.
